## Electronic Sectionaliser

## Sectolink

12kV, 24kV, 36kV

Electronic Sectionalisers have been developed for usage on overhead distribution lines to eliminate transient faults. They are typically used in conjunction with a recloser and replace the traditional dropout fuse protection.

## 12, 24, 36kV voltage rating

Available in two sizes of $12 / 24 \mathrm{kV}$ and 36 kV with pickup current ratings from 8 A up to 400A.

## Simple customisation

The sectionaliser performance settings can be manually adjusted with ease.

## Various mounting options

Single, double or three pole ganged mounts available with hotstick operation.

## One EDO size fitsall

Fits standard single venting 150kV BIL and 170kV BIL EDO mounts.

## Features

## LOW OR HIGH CURRENT

The sectionaliser suits installation in low and high current applications such as SWER lines or rural locations.

## RECLAIM TIME

With fully customized reclaim time, the sectionaliser can be programmed at time of manufacture to suit any network and recloser protection requirements

## GANGED OPERATION

Our custom design two and three phase mounts include a fully ganged operation ensuring sectionaliser dropout of all 3 phases and reducing any ferro-resonance problems.
